

To register a student in Fairfax County Public Schools, parents must provide:

1. Proof of residency:

A deed, lease agreement, or resident manager's letter and signed attestation indicating the current residence. If the family is living in the residence of someone else, a signed attestation indicating the current residence and three supporting documents to that effect are required as evidence of non-temporary residence.

Parents must notify their child's school when their home address changes and provide proof of their new residence. If families move out of Fairfax County, children are no longer eligible to attend Fairfax County Public Schools (FCPS) and will be withdrawn.

The student must be accompanied by the person with whom he/she lives, either a parent or a court-appointed guardian or legal custodian. The accompanying adult will be required to present photo identification.

Physical presence of the parent in the residence of the child is required for tuition-free enrollment in FCPS. A change in enrollment status may be necessary if a parent initially enrolls the student but leaves Fairfax County. Virginia law and FCPS School Board policies and regulations set criteria regarding the enrollment of children by nonparents. Having legal custody is only one of the requirements that must be met.

2. Proof of birth:

An original birth certificate is required for all students. If a birth certificate is not available, an affidavit with substantiating documentation is required.

The legal name of the student as shown on the original birth certificate will be entered in the student record. Changes to an original birth certificate must be supported by a court document.

3. Documentation of previous educational program:

School records and/or original transcripts are required of secondary students and recommended for elementary students. If a translated document is submitted, the original document in the original language must also be supplied.

4. Health documentation (See current version of [FCPS Regulation 2101](#)):

IMMUNIZATION REQUIREMENTS ON BACK

PHYSICAL EXAMINATION:

A certificate (e.g. Commonwealth of Virginia School Entrance Health Form MCH-213) of physical examination (including required screenings) completed within the last 12 months prior to starting school by a U.S. licensed physician, licensed nurse practitioner, or licensed physician assistant acting under the supervision of a licensed physician is required for all students being admitted for the first time into kindergarten or elementary school. Transfer students entering elementary school must provide either a record of a physical examination completed prior to enrolling in the previous school or a record of a physical examination dated within the last 12 months.

The Fairfax County Health Department provides referral information to community medical resources providing free physical examinations.

TUBERCULOSIS SCREENING REQUIREMENTS:

For all students who were born in, resided in, or visited a foreign country included on the **High TB Burden Country List**, <https://www.fcps.edu/sites/default/files/media/forms/HighBurdenTBCountryList.pdf>, for a consecutive period of four weeks or longer, one of the following is required:

- Evidence of a negative tuberculin skin test (TST) or Interferon Gamma Releasing Assay (IGRA) and a negative symptom screen. These must be completed within 90 calendar days prior to registration and must be certified by a U.S. licensed healthcare provider or department of health.
- Evidence of a normal (negative) chest X-ray taken within 90 calendar days prior to registration.
- Documentation of a negative symptom screen and risk assessment from a U.S. licensed healthcare provider or department of health for students who present written documentation of having completed treatment for latent tuberculosis infection or TB disease.

SCHOOL & DAY CARE MINIMUM IMMUNIZATION REQUIREMENTS

Documentary proof shall be provided of adequate age appropriate immunization with the prescribed number of doses of vaccine indicated below for attendance at a public or private elementary, middle or secondary school, child care center, nursery school, family day care home or developmental center. Vaccines must be administered in accordance with the harmonized schedule of the Centers for Disease Control and Prevention, American Academy of Pediatrics, and American Academy of Family Physicians and must be administered within spacing and age requirements (available at <https://www.vdh.virginia.gov/immunization/immunization-manual/acip/>). **Children vaccinated in accordance with either the current harmonized schedule or the harmonized catch-up schedules (including meeting all minimum age and interval requirements) are considered to be appropriately immunized for school attendance.** (See “Supplemental Guidance for School-required Vaccines” for additional information.)

Diphtheria, Tetanus, & Pertussis (DTaP, DTP, or Tdap) - A minimum of 4 properly spaced doses. A child must have at least one dose of DTaP or DTP vaccine on or after the fourth birthday. DT (Diphtheria, Tetanus) vaccine is required for children who are medically exempt from the pertussis containing vaccine (DTaP or DTP). Adult Td is required for children 7 years of age and older who do not meet the minimum requirements for tetanus and diphtheria. Effective A booster dose of Tdap vaccine is required for all children entering the 7th grade.

Meningococcal Conjugate (MenACWY) Vaccine - Effective July 1, 2021, a minimum of 2 doses of MenACWY vaccine. The first dose should be administered prior to entering 7th grade. The final dose should be administered prior to entering 12th grade.

Human Papillomavirus (HPV) Vaccine - Effective July 1, 2021, a complete series of 2 doses of HPV vaccine is required for students entering the 7th grade. The first dose shall be administered before the child enters the 7th grade. After reviewing educational materials approved by the Board of Health, the parent or guardian, at the parents or guardians sole discretion, may elect for the child not to receive the HPV vaccine.

Hepatitis B Vaccine - A complete series of 3 properly spaced doses of hepatitis B vaccine is required for all children. However, the FDA has approved a 2-dose schedule **ONLY** for adolescents 11-15 years of age **AND ONLY when the Merck Brand (RECOMBIVAX HB) Adult Formulation Hepatitis B Vaccine** is used. If the 2-dose schedule is used for adolescents 11-15 years of age it must be clearly documented on the school form.

Measles, Mumps, & Rubella (MMR) Vaccine - A minimum of 2 measles, 2 mumps, and 1 rubella. (Most children receive 2 doses of each because the vaccine usually administered is the combination vaccine MMR). First dose must be administered at age 12 months or older. Second dose of vaccine must be administered prior to entering kindergarten but can be administered at any time after the minimum interval between dose 1 and dose 2.

Haemophilus Influenzae Type b (Hib) Vaccine - This vaccine is required **ONLY** for children up to 60 months of age. A primary series consists of either 2 or 3 doses (depending on the manufacturer). However, the child's current age and not the number of prior doses received govern the number of doses required. Unvaccinated children between the ages of 15 and 60 months are only required to have one dose of vaccine.

Pneumococcal (PCV) Vaccine - This vaccine is required **ONLY** for children less than 60 months of age. One to four doses, dependent on age at first dose, of pneumococcal conjugate vaccine are required.

Rotavirus Vaccine - This vaccine is required **ONLY** for children less than 8 months of age. Effective July 1, 2021, 2 or 3 doses of Rotavirus Vaccine (dependent upon the manufacturer) is required.

Polio (IPV) Vaccine - A minimum of 4 doses of polio vaccine. One dose must be administered on or after the fourth birthday. **See supplemental guidance document for additional information.**

Varicella (Chickenpox) Vaccine - All children born on and after January 1, 1997, shall be required to have one dose of chickenpox vaccine administered at age 12 months or older. Effective March 3, 2010, a second dose must be administered prior to entering kindergarten but can be administered at any time after the minimum interval between dose 1 and dose 2.

Hepatitis A (HAV) Vaccine – Effective July 1, 2021, a minimum of 2 doses of Hepatitis A vaccine. The first dose should be administered at age 12 months or older.
