

## **Student Progress Report**

LAST, FIRST

Student ID: 11111111

District: SAMPLE

School: SAMPLE

Term Rostered: Fall 2024-2025

Norms Reference Data: Growth Comparison Period: 2020 and User Norms<sup>1</sup> Fall to Spring

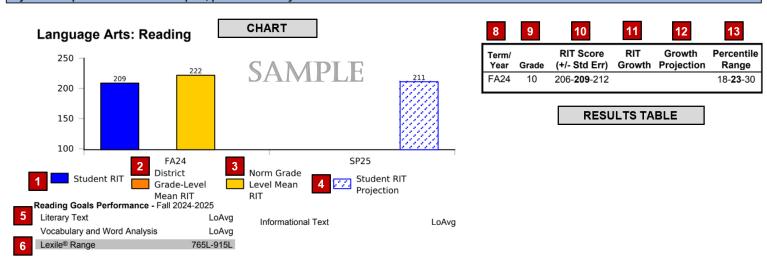

## **Family Guide**

This report displays current and past RIT scores of a student. RIT stands for Rasch Unit, which is a unit of measure that uses individual test question difficulty values to estimate student achievement.

The RIT is used to measure how "tall" a student is on the curriculum scale and scores can be compared to tell how much growth a student has made, similar to measuring height on a yardstick. This score is independent of the age or grade of the student but reflects the instructional level at which the student is currently performing, helping teachers plan instruction at an appropriate level for the student.

If you have questions about this report, please contact your child's school.

## **Chart Legend**

- 1 Student RIT The student's RIT score on each growth test.
- 2 District Grade Level Mean RIT Not reported.
- **3 Norm Grade Level Mean RIT** The average RIT score for students in the same grade tested in the same window, as observed in the most recent norms study. Lack of the Norm Grade Level Mean RIT bar means no norm data is available.
- **4 Student RIT Projection** –The projected RIT score for the student's spring future test. It is based on the student's current RIT score and the average RIT growth of students from in the same grade testing in the same window, as observed in the most recent norms study.
- **5** Goals Performance Lists each goal area tested with a descriptive adjective for the student's performance. The possible descriptors are Low (percentile < 21st), LoAvg (percentile between 21st and 40th), Avg (percentile between 41st and 60th), HiAvg (percentile between 61st and 80th), and High (percentile > 80th). An asterisk (\*) is displayed if the goal score was not calculated.
- **6** Lexile® Range This range appears when the student has taken a reading test. You can use it with online resources to identify appropriately challenging books, and other reading material for the student.

## **Results Table Legend**

- **7 Growth Comparison Period** The time frame used to calculate RIT Growth, Growth Projection and Student RIT Projection values.
- **8 Term/Year** The testing window (FA=fall, SP=spring, WI=winter) and year when the student took the test.
- 9 Grade The student's grade level when they took the test.
- **10** RIT *The middle number is this student's RIT score.* The numbers on either side of the RIT score define the standard error range. If retested soon, the student's score would fall within this range most of the time.
- 11 RIT Growth Not reported until the student has at least two tests in the year.
- **12 Growth Projection** The average growth of students who were in the same grade and began at a similar RIT score in the same window, according to the most recent norms study.
- **13** Percentile Range *The number in the middle is this student's percentile rank,* or the percentage of students that had a RIT score less than or equal to this student's score, according to the most recent norms study. The numbers on either side of the percentile rank define the percentile range. If retested soon, the student's percentile rank would be within this range most of the time.
